

A Century of PACS : Meddiff's Journey

Meddiff Technologies is a global leader in Web based PACS, Teleradiology, Telecardiology, Tele-Nuclear Medicine, and Medical Tele-imaging solutions. We are pleased to share with you the fact that Meddiff became the first Indian company to have reached the milestone of having received 100 PACS (Picture Archiving & Communications System) orders.

This becomes even more significant in the context that it was achieved not only in 3 years but is today more than double of the combined total of the companies active in this space in India, including the biggies like Siemens, GE, Agfa, Fuji etc.

Customers who made it happen for us!
